Basis for evaluating and calculating the subject matter of the selected candidate:

- ⇒ Language and relevance of the subject
- ⇒ Originality and hypothesis - Does the research present a new perspective? Is the hypothesis logical?

- ⇒ Were reliable sources such as research papers, books, and reports used? Literature review, methodology, and data analysis.

1. The released list is not proof that the candidate has been selected in the first stage of the PSY research competition. Since the applicant prepared their research in-house, they will be required to present the original research points to the Board/Screening Committee for interview, which will make it clear that the candidate prepared the research themselves.

2. Selected candidates will be invited for an interview on the relevant topic, or an investigation will be conducted to determine whether the participant has conducted their own research on the given topic, or submitted data by stealing it from Google or external sources, or by using a professional or expert. In such a case, the candidacy of the selected participant may be cancelled.

3. Applicants may resend their email with the subject for reconsideration of their research. Applications for research review will be accepted until March 20th. Please note that only research submitted/submitted previously will be accepted. Copies of research submitted currently will be rejected.

4. It is mandatory to present the complete original copy of the research to the Collector's office on the day of the Excellence Ceremony.
